Honoring Our 30th Anniversary

This year, we celebrate 30 years of commitment to sarcoma patients, survivors, and their families. This is an amazing milestone for any organization, but it is an even larger achievement when you consider that we are the oldest sarcoma organization in the world. This milestone represents years of supporting patients, educating the public about sarcoma, and creating a community where everyone facing sarcoma knows they are not alone.

As we prepare for this incredible anniversary, we reflect on the thousands of lives touched and the countless stories of courage and resilience. Our journey together demonstrates the power of unity and compassion to change lives for the better.

30 in 30: A Challenge for the Future

To kick off 2026 with a bang, we invite you to C.A.R.E. about the rare and join us in a challenge.
30 in 30

We are seeking 30 supporters to give \$30 per month in honor of 30 years of Compassion, Advocacy, Research, and Education (C.A.R.E.).

Your Impact

Your \$30 per month gift helps ensure:

- A patient will receive a Help\$ Grant.
- A patient receives a care package.
- A patient or survivor learns more about research or receives tips for coping.
- Someone facing sarcoma understands they are not alone.

Your small gift, when combined with others, creates real stability.

Please help us look ahead to our 30th. Your support helps us continue to show up for our sarcoma community with hope.

Will you be one of our 30 in 30?

Give \$30 per month today to help us celebrate 30 years of C.A.R.E.

Topic: Wills, Trust, & POA

DECEMBER'S SOCIAL MEDIA BESTS

Ewing Sarcoma Statistics

Ewing tumors are rare and primarily afflict adolescents.

1%

About 1% of all childhood cancers are Ewing tumors

200

Children and teens are diagnosed with Ewing tumors (sarcomas) in the US each year

30%

Of cases arise in children under 10 and another 30% in adults over 20

Our partner organization - Sarcoma Patient Advocacy Global Network (SPAGN) asked sarcoma patients worldwide what first tipped them off, and two answers stood out: PAIN, and an unexplained, fast-growing lump or swelling. Don't downplay the discomfort. Listen to your body, seek medical advice, and ASK the hard questions.

NORTHWEST
SARCOMA
FOUNDATION

Today, we spotlight some recent statistics on Ewing sarcoma. This is a rare variation of sarcoma primarily affecting children and adolescents. #dragonslayersunite #nwsarcoma

Listen to your body. You know it best. Seek out medical advice for chronic pain or a lump larger than a golf ball. ASK the hard questions!
